

PacThing

Based on the familiar PacMan game.

For a version of this project, see <https://scratch.mit.edu/projects/1319280170/>.
Note this is only a demo, not a complete game, and not complete instructions!

Step 1: Set up

- Draw a background, using only one colour for the walls
- Draw a sprite with two costumes – mouth open and mouth shut
- Add this code to start (your numbers might be different):

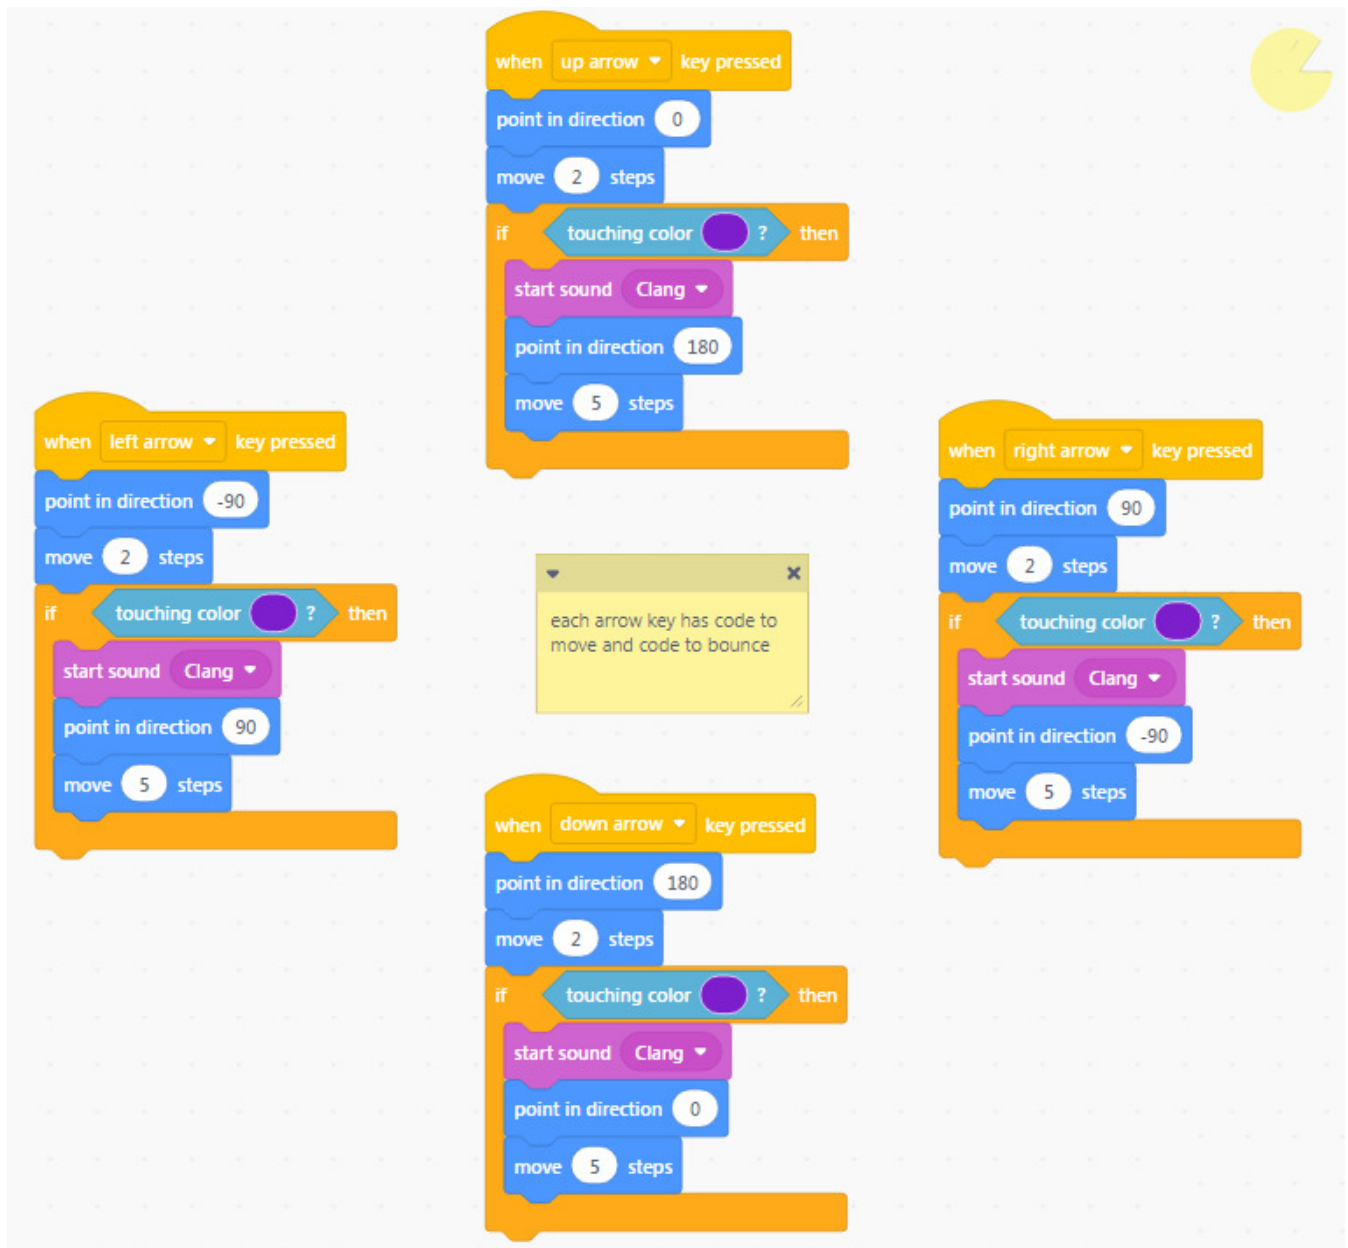

- Test your project, is everything set up ok?

Save your project

Step 2: Movement

- The code for the arrow keys is very similar, except for the numbers:

- If you are a very advanced coder, you could use 'My Blocks' to make the code less cluttered. See the online project for an example.
